

M35 |

This big-block, air-cooled 4-stroke EH99 V-Twin Subaru-powered saw lifts a 24-inch blade out of the cut, yet maintains amazingly compact dimensions. At 3000rpm, the V-Twin provides 35.4hp with 62ft.lbs. of torque, and with hydraulic raise/lower and hydrostatic forward/reverse, the new saw offers the best amenities package and price of any saw its size on the market. At 3600rpm the V-Twin tops-out at 40hp. This new addition to the M.E.C. saw lineup, we're characterizing as a "compact," raises the bar when it comes to power-to-weight ratios. At 34-inches tall, 26.5-inches wide, 37-inches long and weighs-in at less than 700-lbs., the saw is easily transported in lighter-weight trucks, making it ideal for concrete, asphalt, electrical and plumbing contractors; city, county and state Departments of Public Works; water districts; school districts; and the likes. Join the Team, call for more details.

OPTIONS
