

M48-M44D |

Morley Williams, founder of Masterpiece Engineering Co. and its popular MECO line of concrete cutting equipment, presents the latest products from Morley Equipment Company – the M48 and M44D. These saws utilize the same compact easy-to-handle platform, with two liquid-cooled engine options – the 48hp Hyundai ZPP 416 gas engine or for diesel aficionados, the turbocharged 44hp Kubota V1505-TE. These saws lift a 36-inch blade out the cut and with the optional 3-speed gearbox provide the versatility for all size jobs. The easy-to-operate, easy-to-maintain saws are designed to be affordable, dependable and most importantly, a profitable addition to your line-up of concrete cutting options. Feature/benefits include independent drive-wheel motors, hydrostatic forward/reverse and hydraulic raise and lower. These quality- and performance-driven saws were designed and built with being a “great value” as the ultimate objective. Join the Team ... give us a call to find out more.
